### **AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

#### **Listing of Claims:**

Claim 1 (currently amended): A shoe insert comprising:

a synthetic non-woven fabric layer that contains surface fibers oriented in a vertical direction and having an inside portion and an outside portion, said synthetic non-woven fabric layer having ~~and being made from a non-woven material with~~ a coefficient of friction along ~~the~~ said inside portion between about 0.52 and 0.82; and

a non-slip surface disposed along said outside portion of said fabric layer, said non-slip surface ~~and~~ having a coefficient of friction that is greater than the coefficient of friction of said inside portion of said fabric.

Claims 2 - 48 (canceled.)

Claim 49 (previously presented): The shoe insert of Claim 1, wherein said non-woven material of said fabric layer is selected from the group consisting of polyethylene and polypropylene.

Claim 50 (previously presented): The shoe insert of Claim 1, wherein said fabric layer is treated with a surfactant.

Claim 51 (previously presented): The shoe insert of Claim 1, wherein said non-slip surface is defined by a cohesive coating.

Application No. 09/922,239  
Amendment Dated July 26, 2004  
Reply to Office Action of September 24, 2003

Claim 52 (previously presented): The shoe insert of Claim 51, wherein said cohesive coating is selected from the group consisting of low-tack pressure sensitive adhesives, synthetic rubber and latex coatings.

Claim 53 (previously presented): The shoe insert of Claim 1, wherein said inside portion of said fabric layer has a surface treatment selected from the group consisting of a deodorizer and an anti-bacterial agent.

Claim 54 (previously presented): The shoe insert of Claim 1, further including a material layer for incorporating said non-slip surface.

Claim 55 (previously presented): The shoe insert of Claim 54, wherein said material layer includes an inside portion in facing relation to said outside portion of said fabric layer and an outside portion.

Claim 56 (previously presented): The shoe insert of Claim 54, wherein said material layer includes a cohesive coating applied along the outside portion thereof for defining said non-slip surface.

Claim 57 (previously presented): The shoe insert of Claim 54, wherein said material layer is made from a material selected from the group consisting of polyethylene film, polyethylene foam, polypropylene film, polyester film, co-extruded film and laminated foam, laminated foam/film, expanded polystyrene, polyurethane, expanded polypropylene and vinyl.

Application No. 09/922,239  
Amendment Dated July 26, 2004

Claim 58 (withdrawn) The shoe insert of Claim 54, wherein said material layer comprises a first inside material made of polyethylene and a second outside material made of ethylene-vinyl-acetate.

Claim 59 (previously presented): The shoe insert of Claim 54, wherein said material layer is bonded to said fabric layer by means selected from the group consisting of a pressure-sensitive adhesive, cold glue emulsion lamination, ultrasonic bonding, heat sealing, hydro-entanglement and stitching.

Claim 60 (previously presented): The shoe insert of Claim 54, further including an internal ingredient sandwiched between said fabric layer and said material layer.

Claim 61 (previously presented): The shoe insert of Claim 60, wherein said internal ingredient is selected from the group consisting of an odor-neutralizing particulate and a masking fragrance.
